WEBINAR 15 JULY 2020

Mixed-Mode Dispute Resolution and Third-Party Funding Effective Tools for Businesses during COVID-19 Pandemic

2-4 p.m. Vietnam Time - 3-5 p.m. Singapore / Hong Kong time

In this time of Pandemic-linked economic recession, businesses are facing different ranges of conflicts, from contractual breaches to insolvency-based claims. *Mixed mode dispute resolution* and *third-party funding* are two creative tools for resolving such conflicts in a cost-efficient manner. During this webinar, you will learn more on how to employ these tools to leverage your case at the least expenses possible.

Mixed mode dispute resolution focuses on the hybrid methods to resolve a dispute by exploiting the pros and cons of each method.

During this session, you can learn how to tailor a multi-layered dispute resolution clause in your commercial contracts and how this clause affects your case until the enforcement stage.

Third party funding focuses on the advance of fund from an external funder on the principle of *no win, no fee* to sponsor your cases. During this session, you can learn how to strategically deploy third party funding in arbitration and litigation whether onshore or offshore.
